I *Radical-Local Teaching and Learning* præsenteres den pædagogiske teori "radikal-lokal undervisning og læring", som vægter, at børns hverdagsliv og kulturtraditioner bliver integreret i undervisningen: Børn med en multikulturel baggrund lærer lettere generelle begreber, når undervisningen tager udgangspunkt i deres nærmiljø. Bogen introducerer ideen bag teorien ved at trække på den kultur-historiske forskningstradition og beskriver dernæst et konkret undervisningsprojekt for børn med puertoricansk baggrund i East Harlem, New York. *Radical-Local Teaching and Learning* viser undervisere, hvordan man laver undervisnings-forløb, der er gearet til multikulturelle skoleklasser.
